SHARKS PLAY AN IMPORTANT ROLE IN THE ECOSYSTEM

sharks eat predatory fish

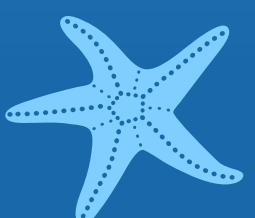

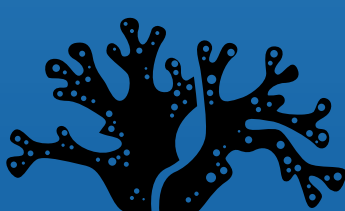

which eat herbivores

which eat algae

which kill coral

1

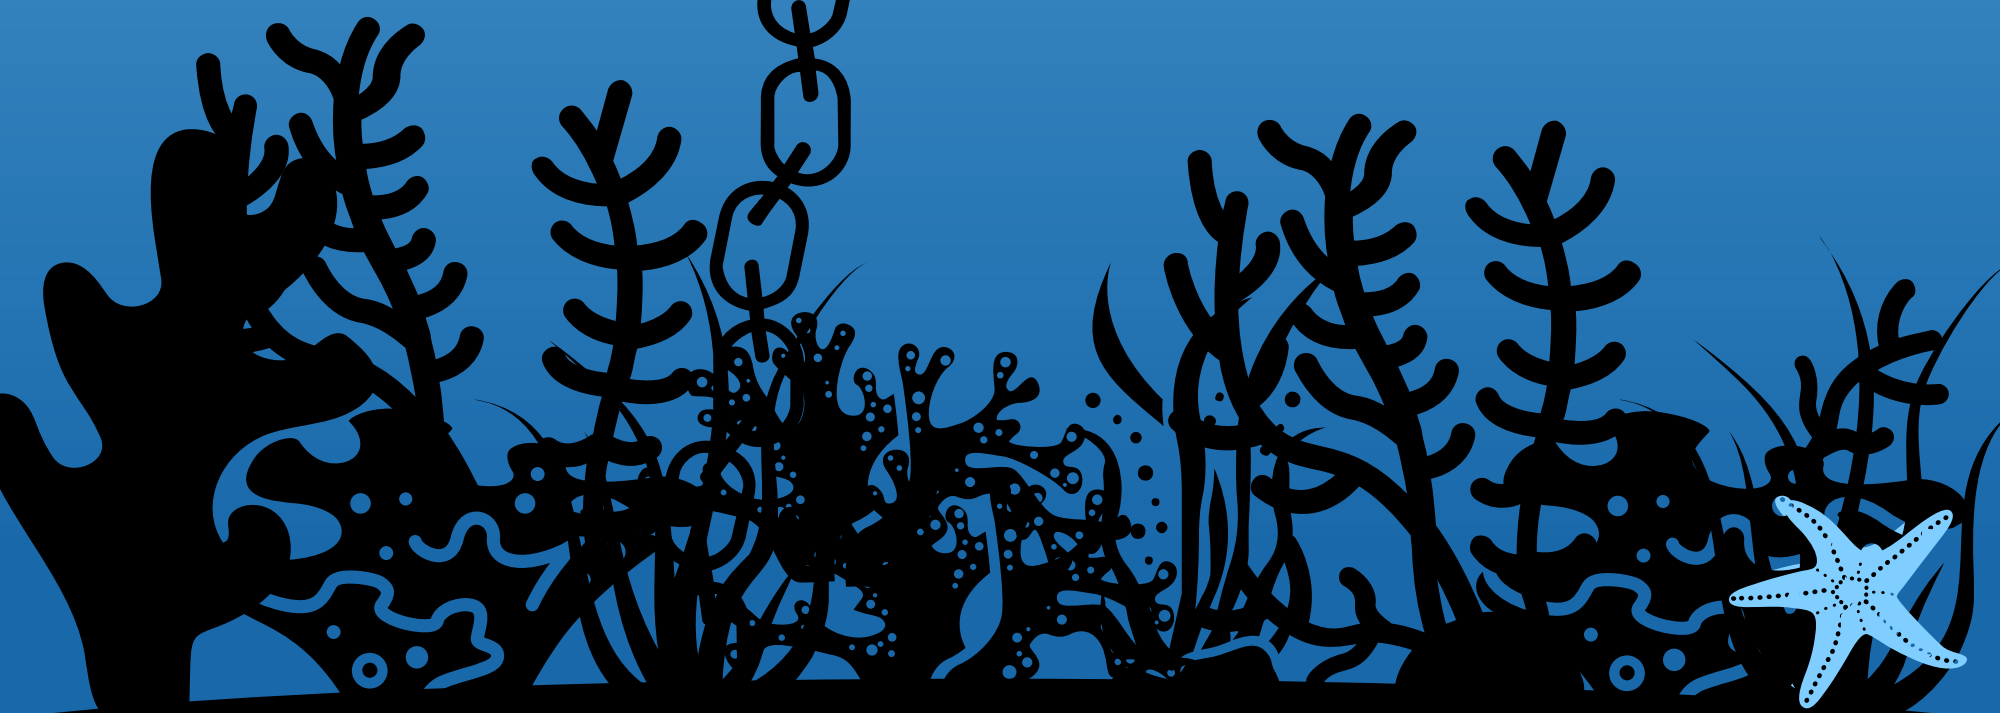

2

3

from their place
at the top of the
food chain...

...sharks limit the
amount of algae
in the ocean...

... and help coral
reefs grow & thrive

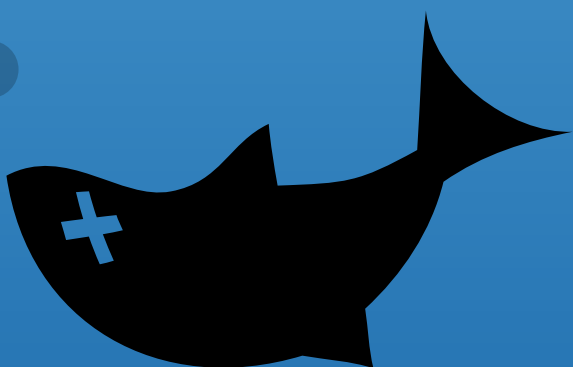

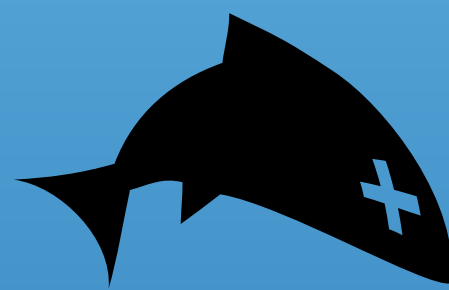

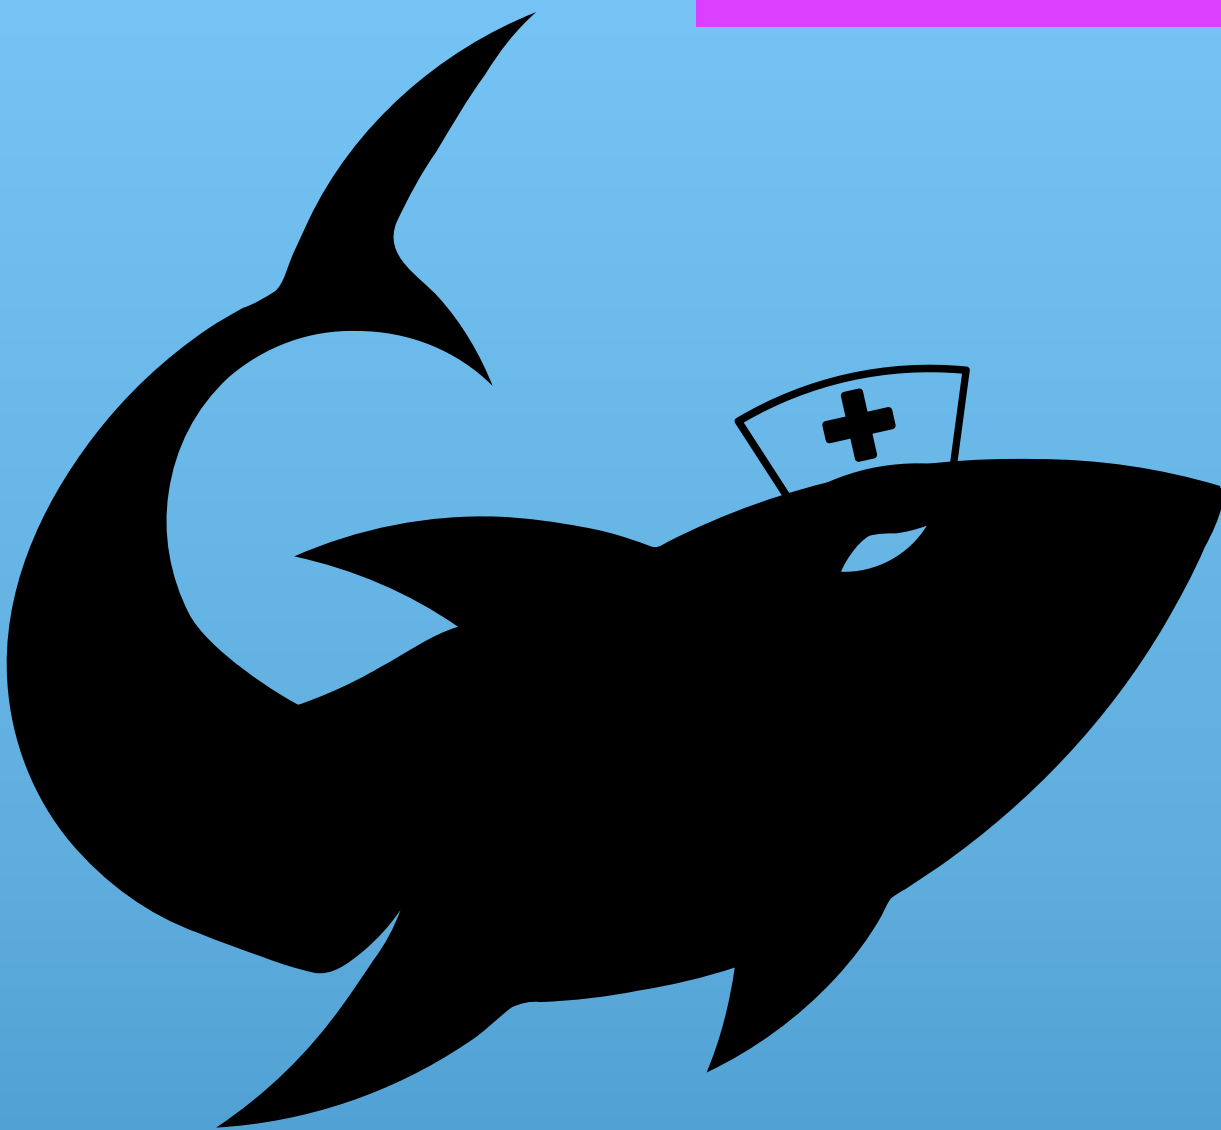

1

2

3

sharks also keep disease
from spreading through
the ocean

...by eating
old, weak,
and sick fish
